Experience

IT Specialist

Access Ohio

Jan 2026–Present

- Administer Active Directory, Microsoft 365, user access, Windows endpoints, and network services for a nine-site organization.
- Troubleshoot VPN, firewall, connectivity, and authentication issues across endpoints and office networks.
- Support onboarding and access changes; document repeatable procedures and resolve staff issues across locations.

Global Consultant

EY / Ohio University Global Consulting Program

May 2025

- Researched Japan's workforce and generative AI trends with an international team; presented findings and recommendations.

Selected Security Projects

Automated SOC Pipeline

Wazuh · Shuffle · TheHive

Built a Sysmon-to-Wazuh alert flow for simulated credential dumping, with VirusTotal enrichment and automated investigation cases in TheHive.

Network Traffic Analysis

Wireshark · PCAP

Documented seven packet investigations covering HTTP recovery, scanning, SMB authentication, Kerberos, and TLS decryption.

IOC Threat Intelligence Analyzer

Python · VirusTotal · OTX

Created a Python tool to classify indicators, enrich batches with threat intelligence, and summarize risk for triage.

Azure SOC Honeypot

Microsoft Sentinel · KQL

Collected attack telemetry from an exposed Windows VM, analyzed events with KQL, and mapped attack sources in a dashboard.
